PACKAGE: LEEP™

BEACHCOMBER GUARANTEE
Peace of mind that your new hot tub will perform as promised is backed by an industry exclusive Guarantee, and not a Limited Warranty!

ECO4WALL™ 100% CAVITY FILLED INSULATION UPGRADE
Our 100% Cavity Filled Foam Insulation system seals the entire hot tub cavity for unparalleled energy efficiency.

CAB FORWARD ENGINEERED PAK SYSTEM
Patented design and technology exterior of the hot tub in its cab forward construction, provides easy access for maintenance and maximum energy savings. The hydrodynamics in design reduces horsepower without sacrificing performance, optimizing the energy efficiency of the Eco4WALL™ insulation.

UL CERTIFIED HEATSHIELD™ COVER
The HEATSHIELD™ Cover creates a vacuum seal around the entire perimeter of the hot tub lip to prevent heat loss.

Britewerx™ FLEXJETS Trim
This is a bright, chrome-like facial trim ring on the face of the FlexJet. Britewerx is designed to give extra beauty, sparkle and ambience to the hot tub whether empty or filled. Britewerx fixtures allow you to choose the number of jets you want.

Everlite™ Moodlighting
Beachcomber's main lighting system for underwater use. This light is made with MicroStar Technology to produce 256 million different shades of digital color. EverLite can be frozen on any shade or color that the bather desires.

ALL-MOTION HYDROTHERAPY
Full body coverage delivering pressurized streams that pulsate, oscillate and knead, with the fusion of injected air and water to actively massage targeted areas for pain relief and relaxation.

PERMA-SEAL™ FOUNDATION
The full thermoplastics foundation encapsulating the bottom of the hot tub seals out ground elements like water, moisture and air, and prevents critter penetration.

ALL-ACTIVE SEATING
All hot tub hydro-massage seats operate at the same time with the press of a single button, allowing for a shared hydrotherapy.

BODY CONTOURED ERGONOMIC DESIGN
Hand-sculpted, ergonomically designed seating to support the contours of your body for comfort and relaxation

FLEXJET CUSTOMIZATION
This is the fixture that houses the water jet nozzles that provide health and massage. FlexJet gives the user free jetting selections and combinations that allow customization of the number of jets desired. Easy removal for mix and match to build the desired number of jets.

PACKAGE: HYBRID4®+ ENHANCEMENT

Premium Acuralux Acrylic
Beachcomber's thermoplastic, cast acrylic finish that is vacuum formed to make the main shell of the hot tub. This finish comes standard in a granite texture, with available Metallic finer finishes.

ClearTech UV Ready
Beachcomber's factory installed system based on Ultra-Violet light technology to purify hot tub water. The ClearTech system continuously produces distilled water which is pumped back into the hot tub, lowering the demand for chlorine or bromine.

Reflex Foot Massage (RFM)
Reflex Foot Massage (RFM) refers to three or four large jets in RFM equipped hot tubs. These jets are designed to provide an unparalleled foot massage equal to or better than a professional masseuse.

Guiding Light LED Step Lighting
A lighting package unique to the Hybrid3 Edition's SafeAxiss Steps. Four separate lighting pods are included in this step option, with high output, long lasting LED light for safety and mood.

Crescent Moon Ambient Lighting
Our advanced-LED technology in integrated into the hand grips with the sleek curved design that illuminates the hot tub with a soft romantic ambience.
